

# Microsoft Teams

Next-gen collaboration for true global connection

## Product Overview

Microsoft Teams solves the problem of fragmented communications solutions by centralizing your disparate applications, simplifying the user experience and IT support, and offering advanced collaboration capabilities. Teams creates a single hub for teamwork by bringing together chat, meetings, calling, app integration, and file sharing. Boost employee productivity, reduce IT burden, and unify data from various sources across the organization — all in one platform.

### Microsoft Teams is right for you if:

- You want to implement a simple, secure, and flexible collaboration solution
- You want to alleviate end user confusion and allow employees to work in one application throughout the day
- You want to reduce costs and inefficiencies related to siloed information
- You want to satisfy various work styles with seamless transitioning from messaging to voice to file sharing

### Teams and Channels

- Create and manage internal project teams and channels
- Use Teams calling, phone system, calling plan, video calling, or direct routing
- Drive connected experiences and next level engagement

### Work Remotely

- Access, share, and edit Word docs, PowerPoints, and Excel files in real time, anywhere
- Gain greater control of collaboration with people outside the organization
- Easy to learn, use, and support

### Apps and Workflows

- Integrate the apps and services you're already using
- Develop apps, automated workflows, and dashboards with low-code tools
- Embed AI and connect data sources with Power Platform

## Why Migrate to Teams?

Teams provides a full suite of communication and collaboration capabilities in a single user experience. We bring product knowledge to get you through the process — as fast and secure as possible. Benefits to migrate are proven and many:

- You can leverage your existing investment in Microsoft technology.
- There's seamless integration with other Microsoft and third-party apps and services.
- Self-service capabilities make it easy to add and support new users.
- Skype for Business is nearing end of mainstream support.

## Partner With Us

Hitachi Solutions is here to help. We've done hundreds of Teams migrations and we can bring that experience to you. Benefits of working with us include:

- Faster time to value
- Maximize value with minimal downtime and disruption
- Assured security and compliance
- Increased user adoption
