

# Azure Purview

## Proof of Concept Offer

### Reimagining data governance

Hitachi Solutions is helping push past the fatigue of continued stop-starts plaguing many data management teams with an innovative Proof of Concept Offer to reset the building blocks. Powered by Microsoft Azure Purview, the offer helps you break down silos and derive actionable business value from your data.

There are a myriad variables, across the organization, that must be considered when it comes to managing and governing your on-premises, multi-cloud, and software-as-a-service (SaaS) data. Our data team has decades of experience supporting clients with migration and implementation of Azure Cloud Data solutions. Our offer provides you the opportunity to prove out how Microsoft's Azure Purview can create a holistic, up-to-date map of your data landscape with data discovery, data classification, and end-to-end data lineage.

### Azure Purview enables unified data governance

Reimagine data governance in the cloud

Set the foundation for effective data governance

Maximize business value of data for data consumers

Gain insight into data use across the estate

### What is the business value to your organization?

The old-school adage of 'garbage in, garbage out' is a quick way to summarize why insights-driven businesses are leaning in on data management strategies — if there is concern about the data going "in," there is little value to the data being reported "out." Ultimately, you need to make data work for the enterprise in a sustainable way. This means removing doubt as to the validity of the data and driving clarity on where it lives, how to get to it, and how to use it.

## How often do you hear?

- Where did the data come from?
- How was the data value calculated?
- How recently has the data been updated?
- What does this data even mean?
- Where can I find the data I need to create a report, and how do I know it's the right data?
- What sensitive data do we have?
- What data do we have that could lead to compliance issues (i.e. HIPPA, GDPR, etc.)?
- Do we have any data that represents a liability that that should be disposed or archived?
- And the list goes on...

# Microsoft Azure

## We can help

Our data team has decades of experience supporting clients with migration and implementation of Azure Cloud Data solutions. We know the needs of the database, data warehouse, and reporting systems user, and we understand the degree of reliance business users have on data to make informed decisions. To converge the two — in your environment, with your data — the Hitachi Solutions Proof of Concept offer is designed to demonstrate Microsoft Azure Purview, with specific focus on:

- Ingesting metadata from hybrid data sources through Purview Data Scanning
- Identifying potentially sensitive or liability-causing data through Purview Data Classification
- Documenting data lineage in your Azure Data Environment
- Implementing a searchable Data Glossary to better describe data assets

Our offer provides you the opportunity to prove out how Microsoft's Azure Purview can create a holistic, up-to-date map of your data landscape with data discovery, data classification, and end-to-end data lineage.

# Working with Hitachi Solutions

Hitachi Solutions has the Microsoft technology experience and market-leading skills in change management, business processes and workplace advisory services. In short, we combine the best of both worlds — **technology and business**. We'll help solve your most pressing migration challenges and deliver the **reliability, performance, and security** your business stakeholders expect.

## How We Compare

### Team Experience

With over 16 years experience on average, our team members offer unmatched expertise throughout the entire project lifecycle.

### Industry Recognized Practices

From DevOps and automation of infrastructure to code delivery and regulatory compliance, our team is able to execute across the entire technology sphere.

### Collaboration

We build solutions for the modern era and meet your teams where they're at, whether in the office, remote, or across the globe.

### Guiding Practice Principles

Our four practice principles guide the way we work: High Quality, Continuous Feedback, Predictable Delivery, and Embrace Change.
