

# Harness AI and Safeguard Your Privacy with Enterprise Chat

Powered by GPT-4

For less than \$1,000 a month, you can reap the power of AI chat to improve customer experiences, streamline operations, save time, and enhance insights into your organization – all within a secure platform that protects your privacy. **And you can get it running in less than a day.**

Enterprise Chat opens your company to new insights and opportunities in an affordable, powerful package that offers a tremendous opportunity to transform virtually all office work through automation. The average user can save up to an hour a week on routine tasks, such as proofreading, troubleshooting, researching, writing emails, and content.

Hitachi Solutions Enterprise Chat brings the cutting-edge AI capabilities of ChatGPT securely to your organization through a SaaS offering that leverages AI to enhance customer interactions, improve productivity, and streamline workflows, all while maintaining strict data privacy.

Organizations that don't adapt quickly risk being left behind. This is your opportunity to unlock the true potential of your enterprise with our secure Enterprise Chat solution, designed to revolutionize the future of knowledge work.

## What Is Enterprise Chat?

Enterprise Chat offers a secure way to access ChatGPT across your entire organization, which will give you peace of mind when using chat to provide quick answers, helpful tips, and support for various tasks. Think of it as your one-stop information hub, here to assist whenever needed, from any device.

## So what is it?

An AI-Powered website enabling users to interact with a large language model through a chat interface.

Built with privacy and responsibility at its core.

User-friendly platform to create and share chat sessions and prompts.

Users can customize the personality, audience, and format to tailor their desired outputs.

## Try It Now!

You can be up and running with AI in less than 24 hours. Our enterprise package unlocks all advanced options at a monthly subscription cost, specifically addressing business requirements.

### What's included:

Setup secure Enterprise Chat portal

Prep environment for data enrichment

**\$995/month for 40 users**

Want to make the most of your large data sources, like Dynamics 365? Our premium package includes all the above plus three weeks of implementation, road mapping, and design starting at **\$39,500**.

## Harnessing AI. Safeguard Privacy.

Take full control of your data while using OpenAI's services, securely and confidently, through Enterprise Chat.

- Your data stays yours - used solely for honing your own models, not by Microsoft or OpenAI for their enhancements
- Harmful content moderation opted into by default
- Rely on our ISO 27001-certified, secure integration with Azure's OpenAI service — your confidential data remains secure

## Not Sure How to Get Started?

Microsoft AI provides *billions* of intelligent experiences every day in everything from Microsoft 365 and Teams, to Copilot and Azure OpenAI Services. Microsoft's AI tools and technologies are being integrated into every level in every organization. But it can be overwhelming.

The need to understand how these solutions fit into your company's broader Microsoft ecosystem is imperative to the long-term success of any organization.

In our [two-week assessment workshop](#), our team of experienced advisors provide guidance on the latest capabilities across the suite of Microsoft AI enabled applications and tools. This assessment was created to give you a clear and concise understanding of the AI capabilities across the Microsoft platform, the opportunities to use this technology in your organization, the organizational gaps that may inhibit your adoption, and how to overcome them.
