Power CAT

PowerCAT Kickstarter Workshops
by Hitachi Solutions

A Series of **Power Platform Workshops** on **business value**, **prioritization, governance**, **scalability**, and **low code community growth** and **continuity**

At Hitachi Solutions, we are dedicated to helping organizations harness the full potential of **Microsoft Power Platform**. **A 2024 Partner of the Year Award Winner for Low Code Innovation and a finalist in automations**, our Power Platform Kickstarter Workshops are designed to maximize adoption by helping customers **establish objectives** and key results (OKRs), **measure the business value of applications and automations**, envision and **build a community of champions** to drive maker success and adoption, **up-skill customers on governance and security**, and **explore advanced capabilities** of the Power Platform.

Traditionally offered only to the largest Microsoft customers, PowerCAT workshops are **now available to everyone**. Hitachi Solutions has successfully delivered these workshops to numerous customers across diverse industries, driving significant business value and digital transformation. Now it's your turn!

Here's What Customers Are Saying:

Strategic Clarity and Innovation: "*The workshop was helpful to understand the company strategy and potential path forward. Success with the Power Platform is contingent on our execution of the strategy.*"

Unlocking Possibilities: "*This has built our strategic plan for us. There's a huge use case here for things that can be done safely, quickly, and effectively. The best solutions are close to the problem.*"

Actionable Insights and Momentum: "*Coming out of the workshop with clear calls to action would help us maintain momentum.*"

Future-Focused Programs: "*It helped me to understand more about how different groups in the company view the vision for the tool and how it could be applicable to our citizen development program.*"

Value and Engagement: "*I'm confident we can do this and unlock a lot of value and enable our workforce to be better engaged and more efficient.*" -

Discover Kickstarter

Designed based on customer insights from across industries and around the world and developed by Power Platform experts — the Power CAT Kickstarter Workshop Series will set you up for low code success.

5 PowerCAT Workshops to Choose:

1 Vision Metrics & Goals

Workshop Description:
This workshop helps organizations co-create an inspiring vision for the Power Platform and an actionable strategy aligned with business strategies and values. Participants will define purposeful OKRs, prioritize an initiatives roadmap, and develop a Strategy on a Page to drive growth that is supportable and sustainable.

Your Outcomes:
Clear vision and roadmap to activate strategic priorities and unleash organizational potential.

2 Designing Secure & Compliant Governance

Workshop Description:
This workshop provides an engaging mix of discussions and demonstrations to help organizations build a robust governance strategy for the Power Platform. Participants will identify key governance initiatives, design their Power Platform RACI matrix, and explore environment strategies to ensure safe and compliant app deployment.

Your Outcomes:
Tools and confidence to safeguard, operate, and monitor the Power Platform environment effectively.

3 Platform Scale & Resilience

Workshop Description:
A deep dive into the data storage, connectivity, and security technologies underpinning the Power Platform. Participants will learn how to design and secure the Power Platform for enterprise-scale applications, avoiding silos and supporting data management goals.

Your Outcomes:
Thorough understanding of handling increasing business use cases' complexity, criticality, and scale.

4 Measuring & Communicating Business Value

Workshop Description:
Combining theory and practice, this workshop teaches participants what to measure and how to assess and communicate the value of the Power Platform. Participants will learn to calculate ROI, craft compelling success stories, and utilize a Business Value Toolkit to influence and inspire diverse stakeholders.

Your Outcomes:
Skills to assess platform value and communicate successes effectively across the organization.

5 Powering Community Success

Workshop Description:
Designed to boost employee engagement and harness human capital, this workshop builds a vibrant community of citizen developers. Participants will explore key ingredients to engage and support makers, discover tactics and tools to launch and sustain their community, and develop a clear community purpose and goals.

Your Outcomes:
Know-how to set up, engage, and monitor a Power Platform Maker Community.
