Offer: Engage for Conversation Assessment

Microsoft Solution Area: Business Applications

Microsoft Solution Play: Connected Sales and Marketing

Overview

Hitachi Solutions Engage for Conversation (E4C) delivers **AI and cloud integration**. It **centrally and securely connects employees' mobile devices to business systems, processes, and information**. Easily accessible and chat based, it keeps them on track to be productive, and successful — no matter where they are working. Engage for Conversation helps employees do their job better, faster, and improves overall performance for your enterprise.

This collaborative tool streamlines the way people interact with complex processes, giving them visibility, insights, and a frictionless experience. Armed with the information they need to do their job, they can now better understand situations in real time, build strong and trusted relationships, and always stay a step ahead of customer and prospect needs.

No Cost!

Why Take Action?

- **Demo** how a conversational AI platform enables organizations to build user-friendly applications like chatbots and voice assistants that provide a simple, real-time way to interact with enterprise applications. It also helps to connect with customers at scale and deliver personalized engagement and support.
- **Roadmap** how to implement E4C for your enterprise
- **Identify** how E4C can solve your unique business challenges

Outcomes

- **Organizational assessment** of how E4C streamlines repeatable processes
- **Document** use-case scenarios
- **Wireframe** for full enterprise integration
- **Understand** how E4C can securely streamline, transform and connect your sales & marketing people and processes
