

Your Fast Track To Analytics & AI

Get usable analytics and AI ready data in days — not months
with the **Hitachi Unified Data Accelerator**

Why Analytics and AI Stall

Platforms are powerful. Foundations are the blocker.

of business data is available to analytics.

of organizations cite data management as a leading obstacle to using AI.

of data is out of reach of analytics and AI tools

Cloud migration can increase data availability, but modernization projects often get derailed, costing time and money.

14%

average data migration budget overrun.

38%

of migrations are delayed a quarter or more when done in-house.

Leading Challenges in Data Migration

Lack of dedicated staff

Insufficient skills

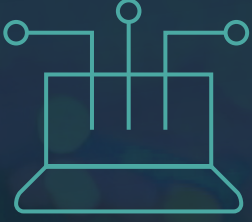

Stuck in prototyping

There’s a Faster Way to Analytics and AI

The Hitachi Unified Data Accelerator is a service, not another data platform. It removes the foundational work required to make data usable for analytics and AI, so organizations can move faster without rebuilding everything from scratch.

Hitachi

Unified Data Accelerator

Unify your data stored in Azure, SQL, Dynamics, and over 200 sources.

Once it’s centralized, you can **generate insights** in just a few clicks.

Reduce Azure spend by up to 65%.

Accelerate time to value by 55%.

Discover what’s Possible With Unified Data Accelerator.

You Keep Your Data Deployed inside your environment with full ownership and control.

We Remove the Heavy Lift Proven reference architecture and patterns replace months of custom engineering.

Usable Data, Faster Analytics-ready and AI-ready data in days, not months.

Leverage Microsoft Fabric to Get to Value Faster.

Since Day 1, Hitachi Solutions has been focused on helping customers achieve their goals with Microsoft solutions.

Our accelerator integrates seamlessly into your existing Microsoft environment, making it easier and faster to utilize all your data to drive the business forward.

For Dynamics users

Implanting our accelerator is simple. Discover how you can start improving decision-making, customer experiences, and more today.

Unleash the Power of Core Azure Data and AI Services.

Platforms are the foundation. The Unified Data Accelerator is how you get value faster.

Microsoft Fabric

An onramp to usable analytics and AI faster

Microsoft Copilot

Azure Databricks

From Lakehouse to analytics and AI without months of custom engineering.
