

Microsoft Agent 365 Governance Accelerator

Establish the foundation for secure, scalable AI agent adoption

Your AI agents are moving faster than your ability to control them.

Without a clear AI governance model, organizations face limited visibility, unclear ownership, growing risk, and pilots that never make it to production.

Agent 365 provides the control plane.

Hitachi Solutions establishes the governance, operating model, and adoption framework required to make it work at enterprise scale.

The Business Problem

As AI agents proliferate across platforms and teams, organizations face:

- ❗ No centralized registry or visibility into deployed agents
- ❗ No defined ownership or lifecycle management
- ❗ Agents interacting with sensitive data without consistent control
- ❗ Multiple AI platforms with no unified governance model
- ❗ Limited ability to track usage, value, or risk

Without a unified governance model, AI adoption becomes fragmented, risky, and unsustainable.

What is Microsoft Agent 365?

Microsoft Agent 365 is the enterprise control plane for AI agents, enabling organizations to:

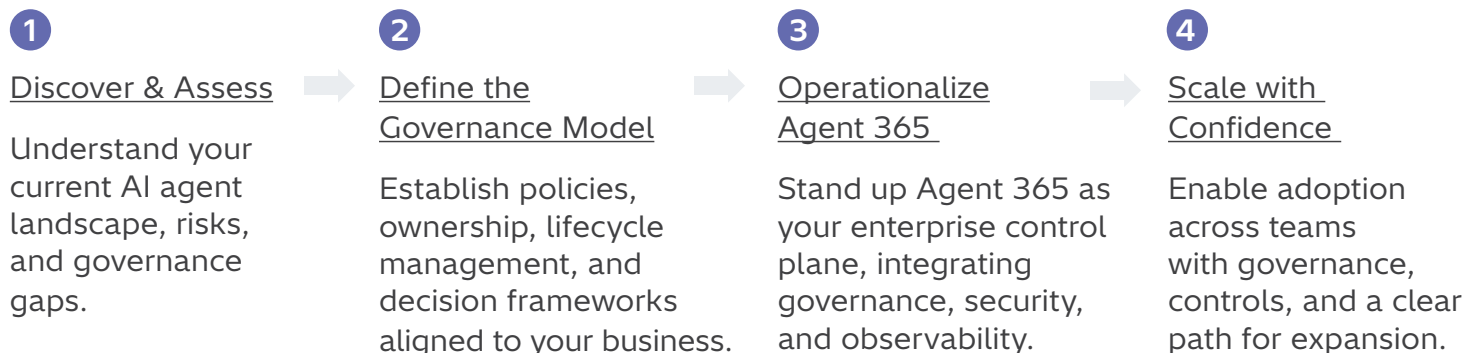

- Observe all agents across platforms and environments
- Govern lifecycle, access, and policy enforcement
- Secure identities, data interactions, and agent behavior

Hitachi Solutions Paves the Way to Governed AI at Scale

We help you activate Agent 365 and establish the governance and operating model needed to scale AI agents across your enterprise.

Our governance-first approach ensures you know where your agents are, how they're governed, and how to scale them with confidence.

Quick-Start Value (Week 1)

- Interim acceptable use policy
- Shadow AI risk assessment
- Copilot and agent guardrails
- Executive alignment messaging

Immediate governance clarity and control from day one.

The Results You'll See

Faster path from AI pilots to production

Reduced security, compliance, and data exposure risk

Centralized visibility and control across all AI agents

Scalable governance foundation for enterprise adoption

Measurable outcomes tied to business value

Why Hitachi Solutions

- ✓ Deep Microsoft expertise across AI, security, and data
- ✓ Proven experience operationalizing governance at enterprise scale
- ✓ Industry-aligned solutions and accelerators
- ✓ Focus on execution, adoption, and measurable outcomes

Move beyond AI pilots.

Establish a governed foundation for agentic AI with Microsoft Agent 365.

Talk to Hitachi Solutions to get started.
